Business Data Applications Launches Healthcare's Next Generation of Contract Lifecycle Management (CLM)

September 2019 – Exeter, NH – Business Data Applications (BDA) today announced the launch of their latest application, Healthy Contracts CLM which allows healthcare administrators to manage their high-risk focus arrangements and associated data & documents with the click of a button. Built on the AWS platform, Healthy Contracts offers a better way for healthcare organizations to save time and money.

“We are excited to offer a contract lifecycle management service with more flexibility and higher levels of performance than anything else in the market at a much more affordable price point,” says Todd Adams, Co-Founder and CEO at BDA. “Healthy Contracts CLM is the result of a two-year collaborative effort between healthcare contract administrators with more than five decades of contract management experience and technology experts.”

Healthy Contracts CLM is a cloud-based solution that features all aspects of contract lifecycle including creation, monitoring of key performance and quality measurements, risk scoring, assessment management, compliance and workflow.

For more information on Healthy Contracts or to set up a demo with one of our contract geeks visit www.healthycontracts.com.

About BDA

Exeter, NH. – BDA was founded by experts in healthcare and technology that believe contract management should be easier and cost less than current legacy systems. By marrying cloud technology to expertise from decades of experience, BDA is delivering Better, Dependable and Affordable solutions for managing critical information. That's BDA.
