### One of the Nation's Top Federally Qualified Health Centers (FQHC) Goes Live With BDA Post Award Grants Management

(August 2019 - Exeter, NH & Redding, CA) – Business Data Applications, Inc. announced today that Shasta Community Health Center in Redding, CA, has gone live with its Healthy Contracts CLM to manage post award grant notices at the Federal, Local and Private levels. They intend to utilize Healthy Contracts for all of their contracts, business associate agreements, certificates of insurance and vendor relationship associations in the coming weeks as well. The decision was based upon BDA's ability to deploy their decades long experience to logically organize and implement their solutions while utilizing real world healthcare use case scenarios in order to optimize the design and delivery methodology.

***"With HRSA's (Health Resources & Services Administration) increased focus on post award grant management and the fiscal demands that FQHC's continue to have, we are excited to help..."*** commented Todd Adams, President of Business Data Applications Inc., ***"...we are so pleased to welcome this top 1% nationally ranked FQHC to our rapidly expanding family of clients."***

BDA is a cloud-based platform of applications, requiring no investment in facilities, hardware, software or internal IT related resource costs. All aspects of agreement and document lifecycle, including creation, monitoring of key performance and quality measurements, risk scoring and assessment management, and compliance are managed in BDA.

#### **About Shasta Community Health Center - Redding, CA**

*Shasta Community Health Center is a non-profit primary health care system based in Redding California and serves Shasta and surrounding counties and communities since 1988. Its mission is to provide quality health care services to the medically underserved populations of the local and nearby communities. Their vision, while working with private and public health partners, and by leveraging and efficiently using its limited resources, will help to create a seamless system of access to compassionate, high quality cost-effective primary and preventive health care for all residents of the communities it serves. Shasta Community Health Center strives to improve the health status within the communities it serves, particularly for those residents who are economically or otherwise disadvantaged.*
